(888) 822-4299

Control Unit

- Lateral Rotation Low Air Loss control unit provides up to 200 liters per minute of air flow diffusing through the mattress surface
- Easy touch control provides variable comfort adjustment
- AutoFirm feature for quick mattress inflation
- Lockout features prevents persons other than care giver from altering mattress settings
- Quiet, efficient true low air loss blower
- Turn Mode gives the care giver the option of 10, 20, or 30 minute cycle times
- Calibration Mode allows care giver to calibrate low and high side of mattress

Support Surface

Air cells are made from 200 denier nylon and 3 mil urethane
Top cover is a 4 way stretch fabric providing a low shear, vapor permeable, patient proof surface. A microfiber quilted lining enhances low air loss diffusion
2" high density foam base provides protection during power loss
18 oz. reinforced vinyl base with wrap around zipper
Supports patient weight up to 350 lbs

Product Specifications

Control Unit
Dimensions: 14" X 5.5" X 11"
Weight: 9 lbs
Electrical Rating: 120V60Hz
Detachable Power Cord: 10 foot
Hospital Grade
Warranty: 2 year limited

Patriot Support Surface
Dimensions: 80" X 35" X 10"
Top Cover: Dura-Plush - 4 way stretch fabric
Air Cells: 200 denier nylon with 4 oz. urethane backing
Power Loss Protection Base: 2" high density FR foam
Base Cover: 18 oz. reinforced vinyl
