TO ASSEMBLE NEBULIZER UNIT

STEP 1
Before you begin, run the Medication Cup under hot water, then tap the cup slightly.

STEP 2
Connect the Medication Cup (containing the OnQ® Aerosol Generator) to the Nebulizer Body. NOTE: Make sure the Aeroneb Go is unplugged before you add medication to the Medication Cup.

STEP 3
Fill the Medication Cup with the prescribed nebulizer medication. Never pour more than 6 mL into the cup. The continuous line on the inside surface of the cup indicates the maximum filling level. (When the medication cup contains medication, the cup should remain in an upright position). CAUTION: To avoid damage to the nebulizer unit, do not use a syringe with needle.

STEP 4
Securely place Cap on Medication Cup.

STEP 5
Attach Mouthpiece or Mask Connector and mask to Nebulizer Body. NOTE: Masks are an optional accessory and may be purchased through evo Medical Solutions or your Aeroneb® Go dealer.

Follow the operating instructions that apply to your specific model.
TO OPERATE WITH A BATTERY POWERED CONTROLLER

Model #7010

1. Turn the Battery Powered Controller upside down. Slide the battery cover in the direction of the arrow to remove the lid. Put in three (3) “AA” disposable alkaline or lithium batteries, matching them to the plus (+) and minus (−) markings inside the Battery Powered Controller.

2. Insert the nebulizer cable connector into the back of the Nebulizer Unit. Slide the cable straight up the nebulizer body.

3. Connect the nebulizer cable to the Aeroneb® Go Battery Powered Controller.

4. Turn on the unit by pressing the “on/off” button on the Battery Powered Controller. The green light on the Battery Powered Controller will light up. Visually verify that aerosol is coming out of the mouthpiece or mask to indicate that the device is functioning properly.

5. Place the mouthpiece between your teeth, with your lips firmly sealed around the mouthpiece. If you use an aerosol mask, place the mask over your mouth and nose. Breathe in and out slowly through your mouth until aerosol formation stops. Do not cover the ventilation holes during use.

6. Press the “on/off” button on the Battery Powered Controller again to turn the nebulizer off. Disconnect the cable from the Nebulizer Unit by sliding the cable straight down the handset, disassemble Nebulizer Unit and rinse Nebulizer Unit Parts after each use. Do NOT remove the retaining ring under the medication cup. Do NOT remove the retaining ring under the medication cup.

NOTE: (1) If you are using batteries and the green light is flashing, your batteries are low. You may finish your treatment, and then replace the three “AA” batteries. (2) If the green light only comes on while depressing the button, immediately replace the three “AA” batteries.

NOTE: (1) The Battery Powered Controller is designed to shut off after 16 minutes. If medication still remains in the cup, press the “on/off” button on the Battery Powered Controller to continue your treatment. (2) Battery life is dependent upon not only the number of treatments per day, but also the length of each treatment. It is recommended that you always have a spare set of new batteries available to you.

To optimize the performance and life expectancy of your Aeroneb Go device, follow the cleaning instructions carefully as instructed on page 11 of your Aeroneb Go Instruction Manual.

To order replacement parts or accessories, visit your local home medical equipment dealer or pharmacy.

If you have any questions or problems regarding your Aeroneb® Go nebulizer, contact your local home medical equipment dealer or pharmacy. Your Aeroneb® Go was tested and inspected at the factory and is a premium device that has a life expectancy of at least one year (730 treatments) with proper care and cleaning. Lack of proper care and cleaning, disassembly of the retaining ring or misuse will void the warranty.

IMPORTANT INFORMATION FOR ALL MODELS

TO OPERATE WITH AN AC/DC POWERED CONTROLLER

Model #7030

1. Insert the AC Powered Controller cable connector into the back of the Nebulizer Unit by sliding the cable straight up the nebulizer body.

2. Plug the AC Powered Controller into a standard AC electrical outlet using the appropriate outlet adapter. The green light on the AC Powered Controller will light up.

3. Visually verify that aerosol is coming out of the mouthpiece or mask to indicate that the device is functioning properly.

4. Place the mouthpiece between your teeth, with your lips firmly sealed around the mouthpiece. If you use an aerosol mask, place the mask over your mouth and nose. Breathe in and out slowly through your mouth until aerosol formation stops. Do not cover the ventilation holes during use.

5. Unplug the AC Powered Controller from the wall to turn it off. Disconnect the cable from the Nebulizer Unit by sliding the cable straight down the handset, disassemble Nebulizer Unit and rinse Nebulizer Unit Parts after each use. Wipe dry the Connector end of the cable after each use. Clean the nebulizer unit and associated parts daily. Do NOT remove the retaining ring under the medication cup.

TO OPERATE BATTERY POWERED CONTROLLER WITH AN AC/DC ADAPTER

Model #7090

NOTE: This model has 2 modes of operation: Battery Powered Controller only (see pg. 2) or AC/DC with Battery Powered Controller.

1. Plug the AC adapter into a standard AC electrical outlet, a green light on the adapter indicates that the AC adapter is turned on. Plug the AC cable into the Control Module, indicated by the Input Symbol (See Classifications and Markings chart in manual).

2. Turn on the unit by pressing the “on/off” button on the Battery Powered Controller. The green light on the Battery Powered Controller will light up. Visually verify that aerosol is coming out of the mouthpiece or mask to indicate that the device is functioning properly.

3. Place the mouthpiece between your teeth, with your lips firmly sealed around the mouthpiece. If you use an aerosol mask, place the mask over your mouth and nose. Breathe in and out slowly through your mouth until aerosol formation stops. Do not cover the ventilation holes during use.

4. Press the “on/off” button on the Battery Powered Controller again to turn the nebulizer off.

5. Disconnect the cable from the Nebulizer Unit by sliding the cable straight down the handset, disassemble Nebulizer Unit and rinse Nebulizer Unit Parts after each use. Do NOT remove the retaining ring under the medication cup. Wipe dry the connector end of the cable after each use. Clean the Nebulizer Unit and associated parts daily.
