Lateral Rotation Mattress System

8” of True Low Air Loss

Nylon, urethane reinforced air cells

Static air bolsters on both sides gives patients sense of security

4 way stretch top cover with quilted liner providing a low shear, low friction vapor permeable surface

Exceptionally quiet, user friendly control unit

Lightweight and compact.
Easy to store and transport.

Manufactured by:

(888) 822-4299
Control Unit

-Lateral Rotation Low Air Loss control unit provides up to 200 liters per minute of airflow diffusing through the mattress surface
-Easy touch control provides variable comfort adjustment
-AutoFirm feature for quick mattress inflation
-Lockout feature prevents persons other than caretaker from altering mattress settings
-Quiet, efficient true low air loss blower
-Turn Mode gives the care giver the option of 10, 20, or 30 minute cycle times
-Calibration Mode allows caretaker to calibrate low and high side of mattress

Support Surface

Air cells are made from 200 denier nylon and 3 mil urethane
Top cover is a 4 way stretch fabric providing a low shear, vapor permeable, patient proof surface. A microfiber quilted lining enhances low air loss diffusion
2" high density foam base provides protection during power loss
18 oz. reinforced vinyl base with wrap around zipper
Supports patient weight up to 350 lbs
